

Installation Instructions & Use Recommendations

FMS Accessories – LH Assault Rifle Mount

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.

Installation of this accessory does not change the factory specified load limits for the motorcycle.

FMS Accessories has developed a mounting bracket to enable agencies to mount the FMS M4 Assault Rifle Mount to the LH side of the motorcycle. The stock FMS rifle mounting bracket is for RH only.

These instructions are supplementary to the FMS instructions which illustrate how to adjust the rifle mount to the weapon and how to wire it to the motorcycle.

Mounting the FMS rifle mount to the LH side will require some minor modifications to the rifle mount to clear the LH turn signal housing as well as to change the gun lock wire exit to the other side of the reinforcement so that the wire is not outwardly visible to the public.

Templates are attached to this instruction for trimming the reinforcement as well as to locate the new gun lock cable exit hole.

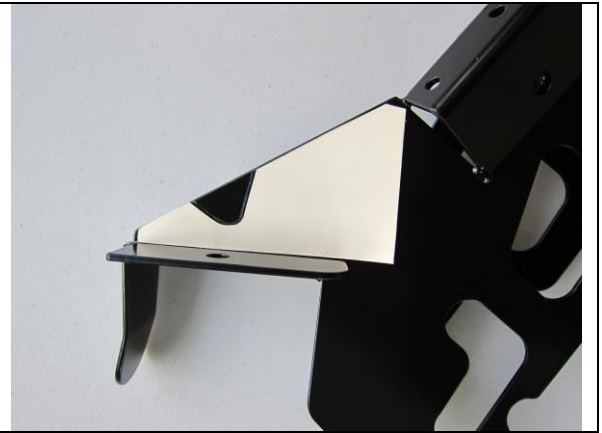

The FMS assault rifle mounting bracket comes with the nut clips and M6 bolts. **Please use red Loctite on the mounting bolts** to ensure they cannot be removed easily.

The BMW M4 assault rifle mount is shipped with similar M6 clip nuts and bolts to secure the rifle mount to the bracket.

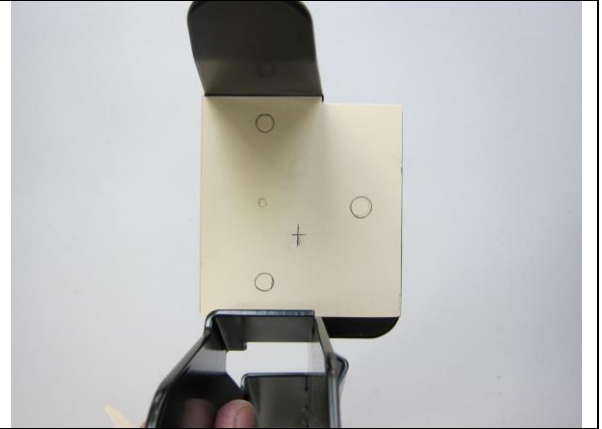

Please template on reinforcement of rifle mount and trim the area shown at right. This relief provides clearance around the LH turn signal.

Grind / debur the surface and touch-up with black paint.

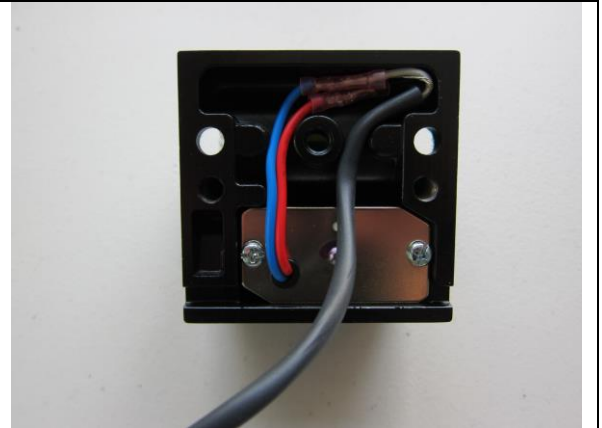

Please the second template over the area of the gun lock mount and center punch as shown for a new 3/8" hole for the cable exit. This allows the gun lock cable to exit the mount on the forward side of the reinforcement, which enables you to drill a hole in the back of the turn signal housing and route the gun lock cable into the motorcycle.

Nest the gun lock cable splices as shown in the photo at right to enable the cable to exit the lock without being pinched.

Tip: it is handy to use a little hot glue to secure the cables between the lock housing reinforcements to ensure nothing moves when you do the final positioning and tighten it down.

Feedback: Thank you for your purchase and we welcome your feedback as we too want to make every accessory exceed your expectations. Report any comments, suggestions, problems or concerns to FMS Solutions, LLC at info@fmsaccessories.com.

FMS Solutions, LLC Limited Warranty

FMS Solutions, LLC warrants to the first retail purchaser of FMS accessory products, to be free from defects in materials or workmanship, for a period of two (2) years from the date of purchase as noted on the original FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. Emergency light heads from Fenix, Inc. and Code 3, Inc. are covered by their manufacturer warranties – processed through FMS Solutions, LLC.

This limited warranty extends only to the FMS accessory and does not cover: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a “tool”. They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty ... it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com.
