

Guidance Document to add discount structure

This document is meant to apply the discount on particular products when user buys them in bulk quantity (2 or 3 quantity).

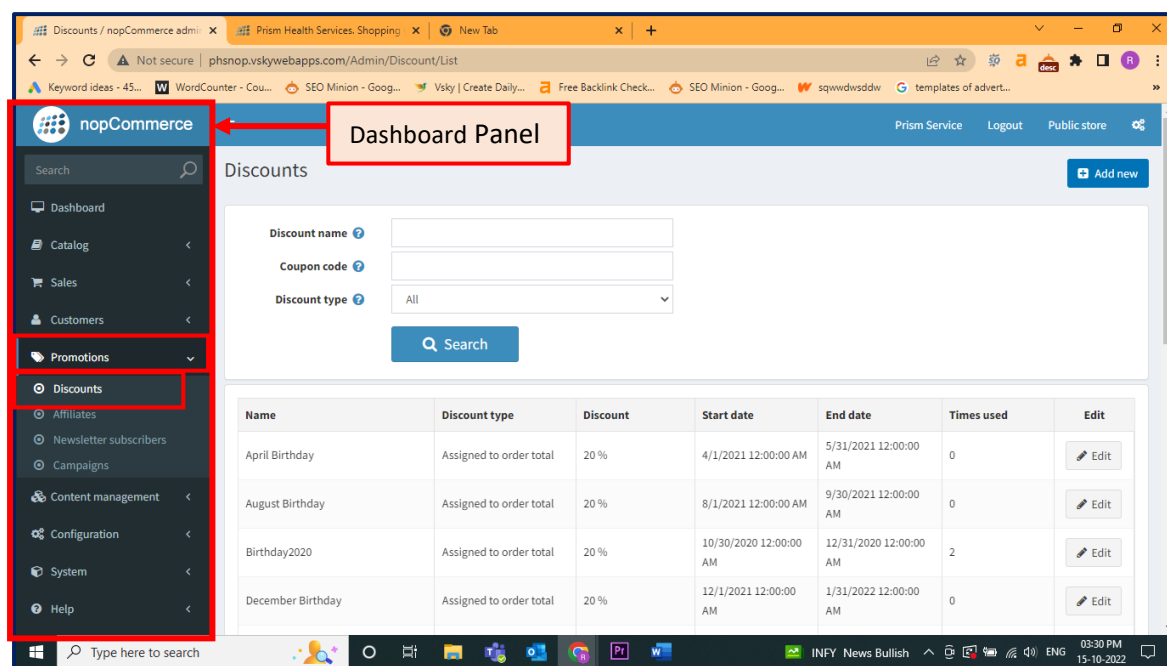

Instructions to add discounts at admin side on NOP Commerce site. There are 5 steps for the settings which are given below:

Step 1. Admin Sign In:

With the admin credentials, Sign-In to **Administration dashboard**.

Step 2. To add discount:

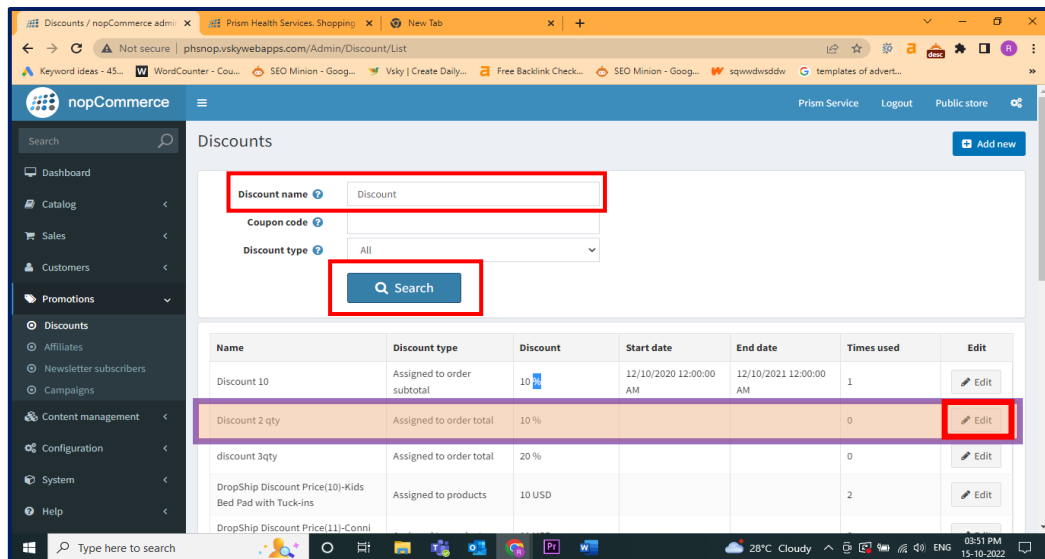

In Dashboard panel, go to **Promotions >> Discounts**

Step 3. In Discounts page:

There are lists of Discounts in the table based on the discount criteria like discount in percentage (%), discount in dollars (\$). Here we already created the discount criteria named as **"Discount 2 qty"** for applying discount while buying 2 quantities of product.

1. Search in the Discount Name textbox >> **Discount 2 qty**
2. Click on **Edit** button in the row of **"Discount 2 qty"** in the table.

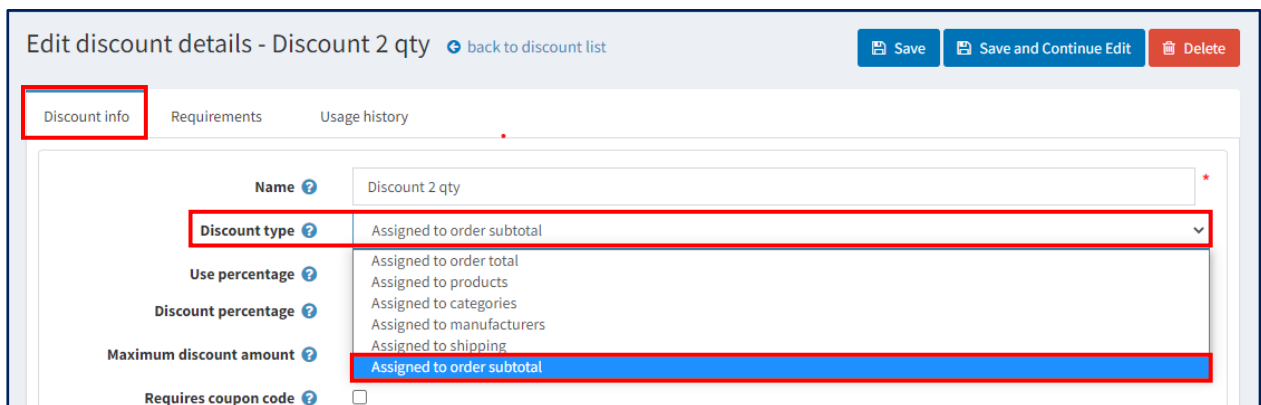

Step 4. When Edit button is clicked, tabs will get open. Following are the tabs which are highlighted.

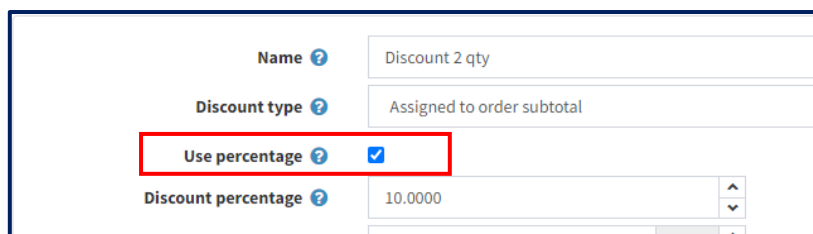

A. Discount Info tab:

To apply the discount on **Order subtotal** in percentage format below are the steps.

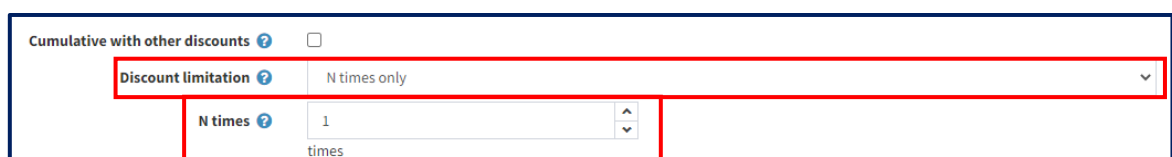

1. Select Discount type as **Assigned to order subtotal**

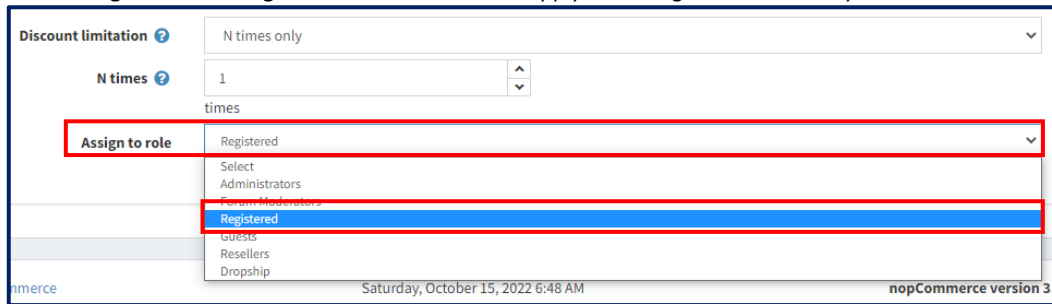

2. Enable checkmark of **Use percentage**

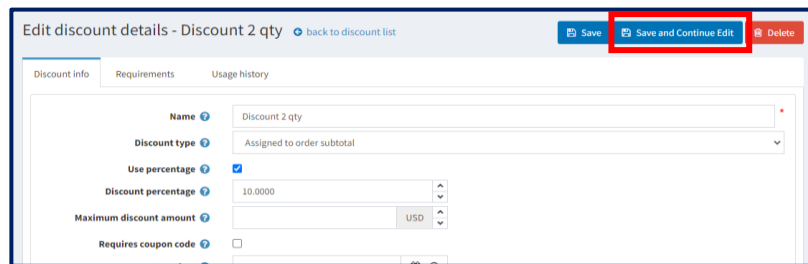

3. Select **Discount limitations** to **N times only** and then select **N times** to **1**. This will allow users to take advantage of the discount only for 1 time.

4. Select **Assign to role** as **Registered**. This discount will apply to the registered users only.

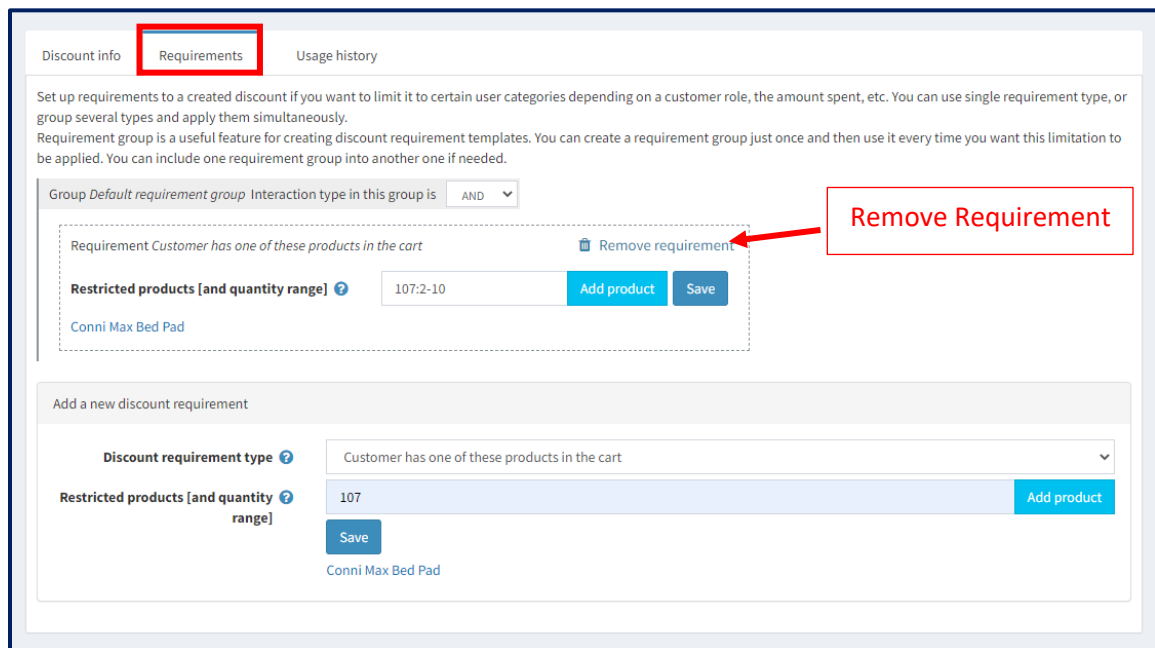

5. Click on **Save and Continue Edit** button to save the settings

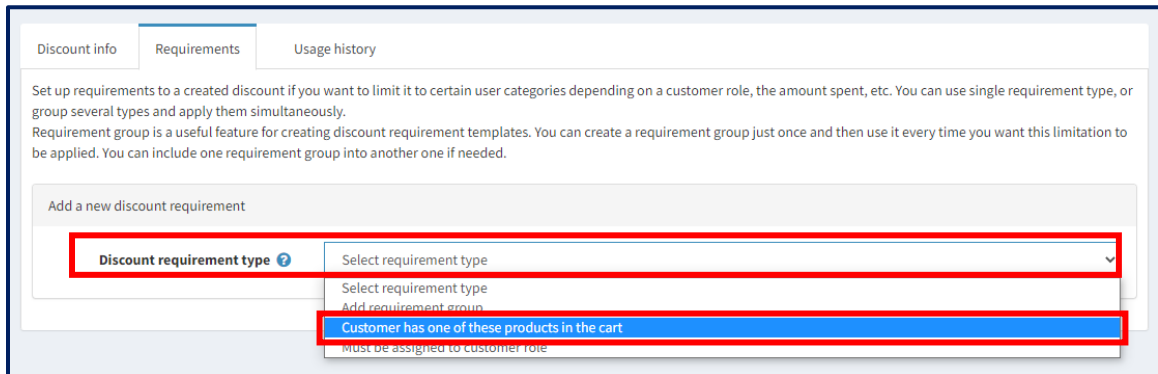

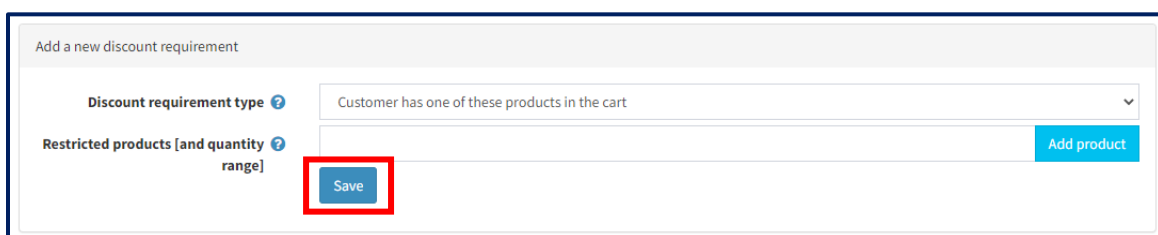

B. Requirements tab:

1. Make sure to remove all the requirement.

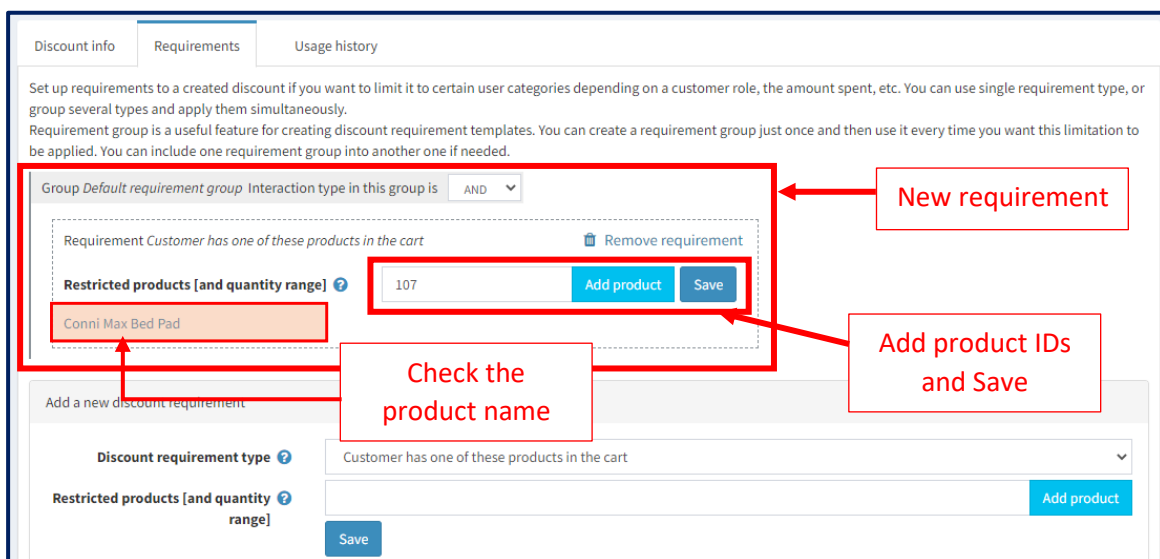

2. Select Discount requirement type as **Customer has one of these products in the cart** and Save

3. Add products

New requirement will be added in same window. Add **Product IDs** and **Save** the requirement.
Following is the syntax to add the Products with IDs:

Syntax	Description	Example
Product ID1, Product ID2, ProductID3	The Product IDs separated by comma	77, 123, 156
{Product ID}:{Quantity}	You can also specify the comma-separated list of product identifiers with quantities	77:1, 123:2, 156:3
{Product ID}:{Min quantity}-{Max quantity}	You can also specify the comma-separated list of product identifiers with quantity range	77:1-3, 123:2-5, 156:3-8

Step 5. Check the applied discounts on that product by adding the numbers of products in to the cart.

Note:

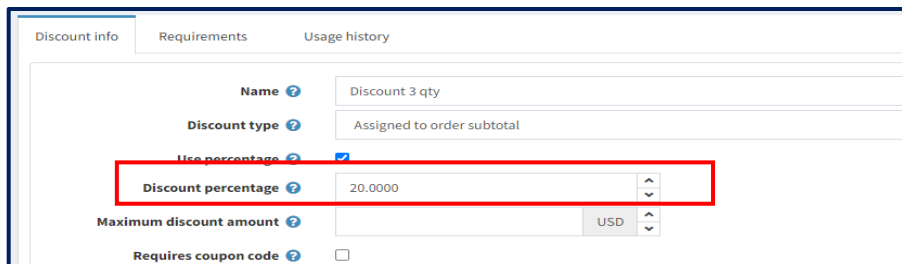

To add the Discount on 3 quantities, please follow the instructions from 'Step 3' with following minor changes.

Step 3.

1. Search in the "Discount Name" textbox >> **Discount 3 qty**
2. Click on **Edit button** in the row of "Discount 2 qty" in the table.

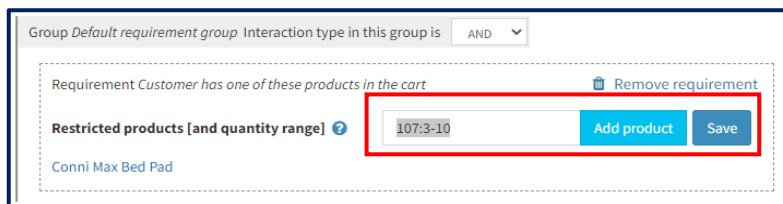

Step 4.

1. Specify the **Discount percentage** to 20 and Click on **Save and Continue Edit**

The screenshot shows the 'Discount info' tab of a configuration form. The 'Name' field is 'Discount 3 qty'. The 'Discount type' is 'Assigned to order subtotal'. The 'Use percentage' checkbox is checked. The 'Discount percentage' field is highlighted with a red box and contains the value '20.0000'. The 'Maximum discount amount' field is empty, and the 'Requires coupon code' checkbox is unchecked.

2. Add products with **minimum quantity** as 3 to maximum quantity. And click on **Save and Continue** button by leaving the rest of the changes as it is.

The screenshot shows the 'Requirement' configuration form. The 'Requirement' text is 'Customer has one of these products in the cart'. The 'Restricted products [and quantity range]' field is highlighted with a red box and contains the value '107:3-10'. The 'Add product' and 'Save' buttons are visible next to the field. The 'Group Default requirement group' is set to 'AND'.
